# Team Work is More Than Just Working In A Team

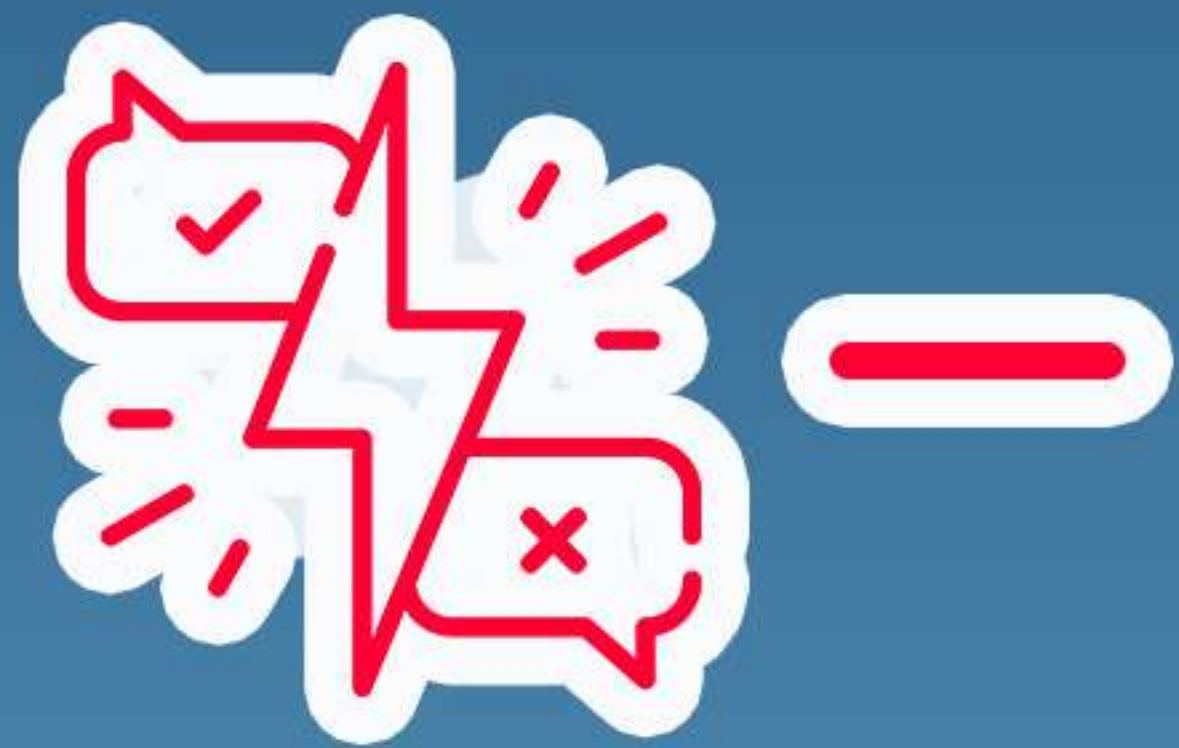

Individuals are often working together in departments, functions and on projects.

But does that automatically result in 'team-work'?

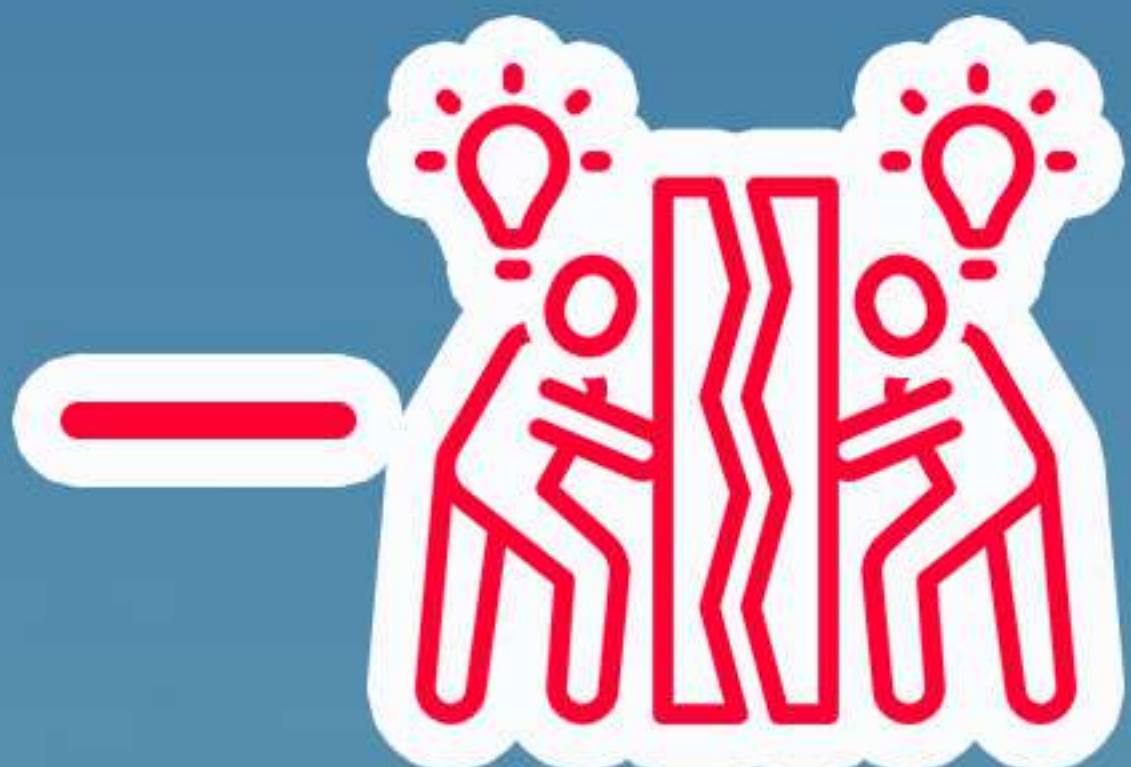

**Turns out, there are barriers like:**

Lack of collaboration across departments.

Conflicts due to individual priorities over shared goals.

The gap between departmental goals and the bigger vision.

Internal competition instead of healthy cooperation.

**Every team has its challenges.  
Let's identify and solve them  
together**
